

Supplier FAQ – Global Data Synchronization Network (GDSN)

How do I share my item data via the GDSN?

This will require a certified data pool service. Are you subscribed to a GDSN data pool?

- **IF you need assistance with a GDSN data pool subscription contact 1WorldSync at:**
 - **Email:** businessdevelopment@1worldsync.com

- IF you are a supplier that is in GDSN already (i.e., subscribed to a GDSN data pool) add Anchovi as a recipient of product data:
 - **Anchovi (“Morsum”) Global Location Number (GLN) is: 0684476691483**

- Visit <https://1worldsync.com/community/find-a-trading-partner/anchovi/> to review other resources on this data sync request such as the Implementation Guide and Supplier Communications

How do I locate my GS1 Company Prefix and GLN?

Please ensure you have a GS1 Company Prefix and Global Location Number (GLN) in order to use a data pool service to publish your item data via the GDSN.

- [Click here](#) to verify if you already have a GLN

- [Click here](#) to sign up for a GS1 Company Prefix and GLN

What if my company is with another data pool?

Your information can be shared through the certified data pool of your choice.

- Confirm that your service is set up to include the Anchovi GLN as a recipient.

Common Acronyms for Sharing Item Data

GDSN

- GDSN is the world's largest product data network that allows any company in any country to share validated product information in real time. Information providers such as brand owners and suppliers load their quality product content in their GDSN data pool to share it automatically with their customers. This allows recipient partners across various industries to have access to the most current and complete product information.

GTIN

- GTIN is to be used by a company to uniquely identify all its trade items.

GLN

- GLN is to be used by companies to identify their locations, giving them complete flexibility to identify any type or level of location required.

Data Pools

- Data Pools are entities that facilitate the electronic transfer of product content between trading partners. 1WorldSync is Anchovi's recipient data pool.
